VOXWARE ANNOUNCES RELEASE OF VOICELOGISTICS PRO™ 2.0

More Power and Flexibility for Industry-Transforming Voice Application Software Toolkit

LAWRENCEVILLE, N.J. — October 2, 2006 – Voxware, Inc. (Nasdaq: VOXW), the leading supplier of voice logistics software and solutions, announced the immediate availability of VoiceLogistics Pro™ 2.0, its revolutionary voice application software development and implementation toolkit. VoiceLogistics Pro is the first enterprise solution to provide a configurable, flexible and open standards-based voice product for the logistics industry. Through its approach of offering intuitive visual and graphical tools with a Service Oriented Architecture (SOA), VoiceLogistics Pro ushers in a new era of quickly and easily configured voice solutions.

Significant new capabilities now available in VoiceLogistics Pro 2.0 include:

- The ability to create more comprehensive Voice applications utilizing multiple workflows and repeated modular functionality.
- The ability to customize work assignment - in batch and real time - to fully support the different ways in which warehouse management systems process work.
- More powerful administrative tools in VoiceLogistics Pro's VoxConsole™ for monitoring and managing worker status and voice performance, and generating targeted communications to workers.
- Enhancement of VoiceLogistics Pro's graphical enterprise application integration (EAI) tool, VoxConnect™, to easily add custom events needed to support specific warehouse management systems, system integrators and other logistics systems.
- The ability to localize solutions for a wide variety of international markets.

Commenting on the VoiceLogistics Pro 2.0 release, Steve Banker, Service Director for Supply Chain Management at ARC Advisory Group, stated, "In a first-hand look I got of this latest 2.0 release, the increased flexibility VoiceLogistics Pro brings to Voice through this new architecture was immediately apparent. Voice already has a great payback period (typically less than a year). Now the increased flexibility from VoiceLogistics Pro provides for a better ongoing Total Cost of Ownership."

Voxware CEO Tom Drury said, "VoiceLogistics Pro 2.0 carries forward Voxware's vision of making voice solutions easier to create while giving customers maximum flexibility and a lower Total Cost of Ownership. We believe that additional power and flexibility for voice logistics applications should not entail increased difficulty, time and expense in design and implementation. We have provided VoiceLogistics Pro software and training to more partners who have validated the flexibility and cost effectiveness of the VoiceLogistics Pro approach. This latest release marks another important step in extending the power and reach of VoiceLogistics Pro." VoiceLogistics Pro 2.0 software is available immediately.

About Voxware

Voxware, Inc. (Nasdaq: VOXW), provides voice-driven logistics solutions that optimize the full spectrum of warehouse operations for greater accuracy, productivity and flexibility in supply chain execution.

Voxware's corporate headquarters are in Lawrenceville, New Jersey, with operating offices in Cambridge, Massachusetts, the United Kingdom and France. Additional information about Voxware can be obtained at www.voxware.com.

This news release contains forward-looking statements. Such statements are subject to certain factors that may cause Voxware's plans to differ or results to vary from those expected including the risks associated with Voxware's need to introduce new and enhanced products and services in order to increase market penetration and the risk of obsolescence of its products and services due to technological change; Voxware's need to attract and retain key management and other personnel with experience in providing integrated voice-based solutions for e-logistics, specializing in the supply chain sector; the potential for substantial fluctuations in Voxware's results of operations; competition from others; Voxware's evolving distribution strategy and dependence on its distribution channels; the potential that speech products will not be widely accepted; Voxware's need for additional capital; and a variety of risks set forth from time to time in Voxware's filings with the Securities and Exchange Commission. Voxware undertakes no obligation to publicly release results of any of these forward-looking statements that may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unexpected results.
