

Voxware VoxPilot®

Gain real-time control and command.

In a distribution center, every second and every decision count. That's why companies rely on the VoxPilot dashboard for real-time insights into operations. It provides the total visibility essential for delivering on customer commitments.

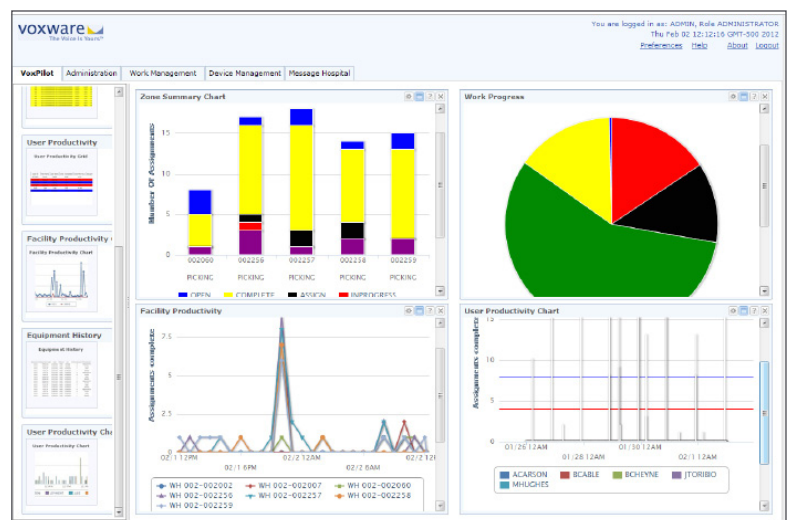

VoxPilot lets you readily see, measure and manage activity across all distribution centers. If problems bubble up, you can drill down to underlying causes and select options to remedy them. This drives unflinching productivity, accuracy and performance.

Your secret weapon for surpassing expectations.

See vital analytics in real time.

Fully integrated with Voxware VMS, VoxPilot puts you in control of critical factors such as worker productivity, shorts, errors and more. The dashboard is easily tailored to each user's function, giving everyone from warehouse managers to logistics executives the data they need to power decisions.

- Zone activity
- Most frequently picked items
- Work in progress
- Productivity by user, by facility
- Exceptions
- Equipment used and not used

Seize the power to intervene.

Whether you're concerned about a worker, an issue, an area – or all three – VoxPilot shows you what's going on, and where. With our one-click bridge to action, operational adjustments and corrections are just seconds away from execution.

Experience the benefits. (Your customers surely will.)

Companies say that VoxPilot has a compelling impact on their business.

- Faster responsiveness to changing dynamics
- Improved customer satisfaction
- Rapid resource optimization
- More collaborative distribution processes
- Greater accuracy and productivity
- Heightened customer loyalty

Take the real-time pulse of your distribution center. See it. Act on it. Constantly improve it.

VoxPilot's unique capabilities give you a complete view and total control of your distribution operations, providing:

Full integration with Voxware VMS – Maintain complete operational visibility, relying on VoxPilot's innovative capabilities to compound the benefits of working with the industry's leading voice solution.

Real-time data analytics – The dashboard's user interface makes easy work of knowing what's going on at all times. Graphic displays translate critical data into visuals that speed comprehension and prompt appropriate actions.

Role-based views and highly usable reports – Tailored to individual users based on their functional responsibilities, VoxPilot gives your entire team the real-time analytics and historical reports they need to be excellent at their job.

Exception-based management – Set key performance alerts based on configurable thresholds and immediately direct managers' attention to areas of critical need – so you can avert crises before they develop.

Friendly competition – Spurred on by healthy competition with their peers, employees monitor how they're performing during shifts and make real-time improvements to personal productivity.

Fast response to changing demands – Deliver exceptional customer experiences, every time, using VoxPilot to execute swift adjustments – such as moving an order fulfillment to the top of a queue or reallocating workers on the fly.

“We live and die by our productivity. Operating at high levels of efficiency is how we deliver our customers a superior customer experience and it plays a large role in how we compensate our employees. With Voxware, we can see the factors that affect productivity much more clearly and in real time, and that helps us make adjustments to operate at peak efficiency.”

Carlos Falcon,
Distribution Center Director,
Puerto Rico Supplies Group

“For me the peace of mind is huge. We have a command center where we can view key operational data from all of our DCs, as things are happening. This allows us to anticipate issues and make adjustments before a crisis develops.”

Jeff Williamson,
Senior Vice President of Operations,
Performance Food Group (PFG)
