FOR IMMEDIATE RELEASE

Voxware Named to *Food Logistics'* 2018 FL100+ Top Software and Technology Providers

Leading trade publication honors Voxware for the sixth time

Hamilton, NJ, December 17, 2018 — *Food Logistics*, the only publication exclusively dedicated to covering the movement of product through the global food supply chain, has named Voxware to its **2018 FL100+ Top Software and Technology Providers** list. This recognition marks the fourth consecutive year Voxware has been named to this list and the sixth overall.

The annual **FL100+ Top Software and Technology Providers** serves as a resource guide of software and technology providers whose products and services are critical for companies in the global food and beverage supply chain.

"The digital supply chain continues its rapid emergence, bringing with it expanded capabilities that impact visibility, security, compliance and efficiency," remarks Lara L. Sowinski, editorial director for *Food Logistics* and its sister publication, *Supply & Demand Chain Executive*. "Every aspect of the global food supply chain stands to benefit from new and innovative software and technology that is fundamentally changing the global food supply chain."

Voxware's Voice Management Suite (VMS) improves speed, accuracy and efficiency across all functions in the distribution center. By supporting multimodal technologies across all workflows, Voxware allows its clients to choose the right solution at the right time, whether that be voice, scanning or vision through its Augmented Reality solution. Some of the customers who benefit from Voxware's solutions include Whole Foods, US Foods, Price Chopper Supermarkets, Performance Food Group, Puerto Rico Supplies Group, Krasdale, Fond du Lac Cold Storage, Anacapri and the Utah Department of Alcoholic Beverage Control (UDABC).

"It is an honor to be recognized for the sixth time by *Food Logistics* as one of the FL100+ Top Software and Technology providers," said Keith Phillips, President and CEO of Voxware. "The well-documented labor shortage and the competition to recruit and retain talent is forcing companies to do more with less. It's also impacting food service companies' margins. One way to overcome this is through automation. The more companies can automate, the more efficient they will be across the board. We are delighted that Food Logistics acknowledges that our technology plays a critical role in the global food and beverage supply chain," he added.

Companies on this year's **2018 FL100+ Top Software and Technology Providers** list will be profiled in the November/December 2018 issue of *Food Logistics*, as well as online at www.foodlogistics.com.

About *Food Logistics*
