Voxware VoxPilot®

Get 10-15% more productivity and drive critical decisions with insights from VoxPilot.

In a distribution center, every second and every decision count. That's why companies protect their brand by relying on VoxPilot for real-time insights into operations. Our analytics provide the visibility and intelligence essential to meet customer commitments on time, every time.

VoxPilot lets you readily see, measure and manage activity across your distribution centers and entire supply chain. It combines and analyzes data from unlimited sources – in Voxware solutions, across your other systems and beyond – to drive improvements in productivity, accuracy and profits.

Your competitive weapon for surpassing customer expectations.

VoxPilot tells you what's happening, explains why, predicts what's ahead, and shows what you can do about it.

Descriptive analytics focus on real-time DC activities	Workforce productivity Work in progress Frequently picked SKUs	Optimize workforce Active adjustments to meet all timelines Optimize pick paths
Diagnostic analytics reveal the "why" behind what's going on	Individual worker productivity Exception errors & shorts Equipment utilization	Eliminate overtime & additional shifts Improve inventory accuracy Improve asset management Reduce costs
Predictive analytics tell about what's to come	Capacity plans based on real data Traffic analysis & weather conditions Labor management & volume matching	Forecast future labor requirements Improve routing & on-time deliveries Optimize workforce & seasonal staffing
Prescriptive analytics reveal what you could and should do	Truck loading & scheduling recommendations Demand forecasts	Avoid late deliveries Advance planning Optimize the entire supply chain

Experience the benefits. (Your customers surely will.)

Companies say that VoxPilot has a compelling impact on their business.

Profit from a Smarter Supply Chain

VoxPilot gives you a clearer view of your operations – so you can react quickly today, predict future needs and always keep customer loyalty strong.

Get the most out of Voxware VMS – Fully integrated with Voxware VMS so you maintain complete, real-time DC visibility, compounding the benefits of using the industry's leading voice, multimodal and AR solution.

Easy integration of data from any source – VoxPilot makes it simple to bring in critical information from other solutions, supply chain systems and external sources.

Purpose built for the DC and supply chain – Specifically designed to help manage crucial challenges such as accelerating fulfillment, asset allocations and workforce optimization.

Graphical and intuitive – Easy-to-understand charts and graphs instantly reveal DC trouble spots and opportunities.

Specific intelligence about specific concerns – VoxPilot provides the flexibility to create dashboards that address your distinct business problems.

Disparate data in a single view – One view of all essential information eliminates need for multiple screens.

Exception-based management – Avert crises before they develop. Set key performance alerts and instantly direct attention to areas of need.

Fast response to changing demands – Deliver exceptional customer service, every time, using VoxPilot to quickly react and adjust.

Cloud-based to extend across facilities and functions – VoxPilot handles boundless volumes of data regardless of location, putting essential analytics at your fingertips.

"We live and die by our productivity. With Voxware, we can see the factors that affect productivity much more clearly and in real time, and that helps us make adjustments to operate at peak efficiency."

Carlos Falcon,
Distribution Center Director,
Puerto Rico Supplies Group
