Voxware Named to *Food Logistics'* 2019 FL100+ Top Software and Technology Providers

Premier industry publication recognizes Voxware for fifth consecutive year and seventh overall

Hamilton, NJ — December 18, 2019 — *Food Logistics*, the only publication exclusively dedicated to covering the movement of product through the global food supply chain, has named Voxware, a leading provider of cloud-based voice and analytic supply chain solutions, to its **2019 FL100+ Top Software and Technology Providers** list. This is Voxware's fifth consecutive appearance on the **FL100+ Top Software and Technology Providers** list and seventh overall.

The annual **FL100+ Top Software and Technology Providers** serves as a resource guide of software and technology providers whose products and services are critical for companies in the global food and beverage supply chain.

"Whether you're using sensors to monitor critical temperatures for perishables or a WMS to manage inventory flows in your warehouse, software and technology are playing a vital role in the food and beverage industry," remarks John R. Yuva, editor for *Food Logistics* and its sister publication, *Supply & Demand Chain Executive*. "The transparency and safety of the digital global food supply chain would not exist without innovations in software and technology. Our FL100+ recipients help drive supply chain compliance and regulatory changes that benefit everyone from the farmer to the food processor to the consumer."

Companies rely on Voxware VMS to improve speed, accuracy and efficiency across all functions and workflows in the distribution center. Using Voxware VMS, customers realize immediate improvements in accuracy, double-digit productivity gains, reduced labor and operating expenses and complete visibility into the entire distribution operations through its supply chain analytics software, VoxPilot.

"It is an honor that Food Logistics recognizes the critical role our software plays in the global food and beverage supply chain," said Keith Phillips, President and CEO of Voxware. "We continue to see the push for automation throughout the entire distribution center, not just for picking. For Voxware, it's about the multimodality of the solution and providing our customers with the right technology to complete their specific tasks. Additionally, companies are learning that just automating with a multimodal solution is only part of the puzzle. Once automated, it needs to be actively managed effectively using advanced analytics to get the maximum output out of the workforce. Beyond that, the data and analytics we provide our food service customers enables them to have complete transparency of their supply chain, giving them more control and protection of the product being delivered to the end customer."

Companies on this year's **2019 FL100+ Top Software and Technology Providers** list will be profiled in the November/December 2019 issue of *Food Logistics*, as well as online at www.foodlogistics.com.

About *Food Logistics*

Food Logistics is published by AC Business Media, a business-to-business media company that provides targeted content and comprehensive, integrated advertising and promotion opportunities for some of the world's most recognized B2B brands.
