

FOR IMMEDIATE RELEASE

Voxware's Voice Automation Solutions Take Center Stage at Modex 2022

Attendees have the opportunity to demo VoxTempo; Realize productivity in less than 10 minutes

Hamilton, NJ & MODEX 2022 – March 15, 2022 – [Voxware](#), a leading provider of voice software and analytics solutions for the supply chain, will give Modex 2022 attendees the ability to see how their automation technology can get warehouse workers productive in less than ten minutes. Booth #7481 will be a popular location throughout Modex for companies challenged by today's tight labor market and those struggling to meet customer demand.

Voxware will also host an on-floor educational seminar on Tuesday, March 29th at 3:30pm ET in Theater I. "*How Voice Automation and Supply Chain Analytics Deliver a Flawless Customer Experience*" will be presented by Octavio Salazar, Vice President of Operations, for Gold Star Foods. Octavio will share how Voxware's multimodal automation technologies including voice, scanning and mobile printing, along with supply chain analytics enabled his company to radically improve accuracy, increase worker productivity and add order volume without hiring new employees. Octavio will also spend time in the Voxware booth answering questions from attendees.

"So much has changed since the last time we attended Modex in 2020," said Keith Phillips, President & CEO of Voxware. "But the one thing that has remained constant is that customers expect on-time and accurate delivery of their orders. Fueled by the explosion of eCommerce the past two years, companies in all industries are looking for ways to overcome labor challenges and still be able to meet growing customer demands. Our voice automation solutions are an affordable option for companies of all sizes looking to do more with less. Our team is excited to welcome attendees back to our booth and share how our solutions can meet their needs."

Within booth #7481, Voxware has created two safe-spaces for guests to demo [VoxTempo](#)[™], Voxware's Natural Language Voice Recognition engine. Using a sterilized headset in this comfortable environment, attendees will see first-hand how their own workers can get up to speed and become productive in less than ten minutes. They will execute a picking assignment just as they would in their own distribution center.

In addition to the [VoxTempo](#) demo, [VoxPilot](#)[®], Voxware's enterprise analytics solution will be on display. Voxware's system design experts will walk guests through various scenarios to show how a number of business challenges can be overcome by deploying these advanced analytics.

Modex 2022 attendees will want to make time to visit Voxware in booth #7481. In addition to the above-mentioned demos, Voxware will have other automation and robotics technology to

discuss. Be sure to [follow Voxware on LinkedIn](#) for more announcements coming during Modex 2022.

About Voxware

Voxware offers technology solutions that deliver essential supply chain information exactly when and where it's needed, optimizing the speed, accuracy and efficiency of distribution operations. Its product suite includes both [warehouse automation](#) and [analytics](#) solutions uniquely focused on distribution functions. With these solutions, companies reach an unprecedented understanding of how best to manage their operations, improving profitability by reducing costs and exceeding customer expectations.
