Voxware Debuts Innovative Solutions at Modex 2022

New solutions solidify commitment to drive more productivity, increase throughput and optimize efficiency to improve distribution operations

Hamilton, NJ & MODEX 2022 – March 28, 2022 – [Voxware](#), a leading provider of voice software and analytics solutions for the supply chain, is debuting its latest innovations in automation at Modex 2022 including its voice automation software combined with Fetch Autonomous Mobile Robots (AMRs). Additionally, a demo of VoxTempo, Voxware’s Natural Language Voice Recognition engine will be available for attendees. Modex attendees can [learn more](#) about these technologies and more by visiting Voxware in booth #7481.

“Labor shortages and increased customer expectations have created unprecedented demand and automation technologies are vital for companies to maintain a competitive advantage,” said Keith Phillips, President & CEO of Voxware, Inc. “We remain committed to helping organizations optimize the workers they are able to employ by improving their productivity and increasing their efficiency throughout the distribution or fulfillment center. I expect our booth to see quite a bit of foot traffic as companies seek the best solution to meet their unique challenge.”

Throughout the Voxware booth (#7481) at Modex 2022, attendees will learn how Voxware’s solutions help companies who are challenged by today’s tight labor market and those struggling to meet customer demand.

Voxware has created two safe-spaces for guests to demo [VoxTempo™](#). Using a sterilized headset in this comfortable environment, attendees will see first-hand how their own workers can get up to speed and become productive in less than ten minutes. They will execute a picking assignment just as they would in their own distribution or fulfillment center.

In addition to the [VoxTempo](#) demo, [VoxPilot®](#), Voxware’s enterprise analytics solution will be on display. Voxware’s system design experts will walk guests through various scenarios to show how a number of business challenges can be overcome by deploying these advanced analytics.

Voxware will also host an on-floor educational seminar on Tuesday, March 29th at 3:30pm ET in Theater I. “*How Voice Automation and Supply Chain Analytics Deliver a Flawless Customer Experience*” will be presented by Ricardo Diaz, Warehouse Manager – Ontario, CA, for Gold Star Foods. Ricardo will share how Voxware’s multimodal automation technologies including voice, scanning and mobile printing, along with supply chain analytics enabled his company to radically improve accuracy, increase worker productivity and add order volume without hiring new employees. Ricardo will also spend time in the Voxware booth answering questions from attendees.

Be sure to [follow Voxware on LinkedIn](#) for more information throughout Modex 2022.

About Voxware

Voxware offers technology solutions that deliver essential supply chain information exactly when and where it's needed, optimizing the speed, accuracy and efficiency of distribution operations.
